Work Nature

About Career

Is geography your favourite subject? Do you love to understand and interpret different types of maps? Do you like to study about the Earth? If yes, you should become a geographer.

Geography is a scientific study of Earth's landscapes, peoples, places and environments. It is a combination of social science and earth science. Geography applies the unifying vision required by many contemporary environmental and social problems. A geographer is a professional who would study the surface of the Earth, various physical locations, climate change, the distribution of the physical elements and resources on Earth.

Cartography - Geographers who specialize in this sub-category of geography make maps, charts, globes, and models.

Examples: Eratosthenes, Al Idrisi, Alexander von Humboldt, Immanuel Kant, Carl Ritter, and Arnaldo Faustini are few of the most famous geographers in the world.

Work Nature

- Investigate and conduct the program for exploration of sites for oil, gas, minerals.
- Prepare and document reports.
- Many geographers work as town planners. Town planners are employed by public and private organizations engaged in urban planning and rural development projects.
- Many geographers study remote sensing. It includes studies of quickly changing phenomena such as floods, drought and forest fires, etc. Remote sensing satellites provide a variety of information about the earth's surface.
